

Because it only takes  
one drop of water...

## The Penguin Nutritional Warmer

has a newly designed  
Therma-Liner™  
that keeps your feedings  
safely sealed away  
from microorganisms  
lurking in tap water

Serratia

Pseudomonas

Candida

Klebsiella

Because it only takes one drop of water...

... to expose a baby to water-borne microorganisms

### The Penguin Nutritional Warmer:

- Minimizes risk of infection by preventing any direct exposure of the bottle to pathogens found in water
- Gently warms feeding to "mom's temperature" and keeps it warm for up to 30 minutes
- Safely thaws feedings just to refrigerator temperature so they can be used up to 24 hours
- Complies with all ADA guidelines for warming and thawing of infant feedings

the **Penguin**  
NUTRITIONAL WARMER™

It makes warming and thawing consistent, safe, and easy!
